EDUCATION

Moradabad Institute of Technology <i>B.Tech in Artificial Intelligence & Machine Learning, CGPA: 8.75</i>	Moradabad, Uttar Pradesh 2023 – 2027
GATE (Data Science & AI) Score: 373, AIR: 8076	2026

EXPERIENCE

AI Automation & Intelligent Solutions Intern <i>AICTE IBM SkillsBuild (BharatCares), Virtual Internship</i>	Jun. 2026 – Jul. 2026
- Completed 6-week internship on AI automation, Agentic AI, workflow orchestration, and AI-powered solutions - Built intelligent automation workflows connecting AI models, APIs, and digital tools in masterclasses - Developed and presented a final AI project aligned with UN Sustainable Development Goals	
n8n Workshop Instructor Moradabad Institute of Technology	
- Conducted 2 hands-on workshops on n8n workflow automation for college students - Delivered a beginner workshop covering n8n fundamentals: nodes, triggers, and workflow building - Delivered an advanced workshop on complex automations, API integrations, and AI-powered n8n workflows	

LLM & RESEARCH EXPERIENCE

- Built LLM systems using LangChain, LangGraph, and RAG pipelines
- Designed prompt engineering and evaluation workflows
- Worked with LLaMA, Gemini APIs, and agent-based architectures
- Focused on memory-efficient training and scalable deployment

PROJECTS

NeuroCache PyTorch, CUDA, Systems	<u>Paper: ResearchGate</u>
- Proposed budget-controlled activation offloading using parameter k for LLM training - Implemented via PyTorch saved tensors hooks with pinned CPU memory - Achieved ~15% GPU memory reduction with negligible throughput change - Identified optimal tradeoff point at $k \approx 5$ under real CUDA execution (RTX 2050)	
AI Interviewer Platform LangChain, FastAPI, MongoDB	<u>Live: Project Link</u>
- Built full-stack LLM-based interview system with automated evaluation pipeline - Implemented question generation, response evaluation, and structured feedback	
Trading Swarm Python, Binance API, Railway	<u>Code: Project Link</u>
- Built production-ready crypto trading bot using FALCON v1 strategy (EMA, MACD, RSI) - Implemented risk controls: ATR-based SL/TP, drawdown limits, and circuit breakers - Designed modular architecture with position manager, trade logger, and alert system - Deployed on Railway with optimized lightweight dependencies for fast builds	

TECHNICAL SKILLS

Programming: Python, SQL
AI/ML: PyTorch, TensorFlow, Scikit-learn, NLP
LLM: LangChain, LangGraph, RAG, Prompt Engineering
Automation: n8n, Workflow Orchestration, Agentic AI
Tools: FastAPI, Docker, MongoDB, Git

CERTIFICATIONS

- NPTEL Elite + Gold (Top 1%) – AI: Concepts and Techniques
- NPTEL Elite + Silver – Developing Soft Skills and Personality
- Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate
- IBM SkillsBuild (2026): Generative AI, Agentic AI, AI Agents, Granite Models, Virtual Agents (watsonx Assistant)
